

"Growing Together: Empowering Farmers & Regenerating Soil"

The SRT Sevak Meet at Saguna Baug

In a recent monthly meeting at the lush expanse of Saguna Baug, our dedicated SRT Sevaks came together, reinforcing our commitment to revolutionize agriculture through the Saguna Regenerative Technique (SRT). Our field team, now comprising five passionate SRT Sevaks, is making strides across Maharashtra, extending our reach to three focused regions in Nashik, Pune and Ch Sambhaji Nagar. This meet not only served as a platform for knowledge exchange but also as a testament to our growing influence in the realm of no-till regenerative agriculture.

Cultivating Knowledge: Bi-Monthly SRT Farmer Training

Understanding the essence of growth through learning, we have initiated bi-monthly SRT farmer training sessions. These workshops are designed to equip our farmers with the knowledge and tools necessary for successful SRT implementation. By fostering an environment of continuous learning, we aim to ensure that every farmer becomes a steward of the land, nurturing it for generations to come.

Stories from the Field

A Tale of Transformation: Yavatmal's SRT Success Story

In an inspiring visit to Yavatmal, our SRT Sevak Mr. Raosaheb More from Ch Sambhaji Nagar, accompanied by Mr. Vitthal Vaidya a dedicated SRT farmer from Jalana, witnessed the remarkable journey of Mr. Sunil Patil. A retired DFO officer with an MSc in Agriculture, Mr. Patil has embraced SRT on his 56-acre farm, cultivating Cotton, Chickpea, and Soybean. His success stands as a beacon of possibility, showcasing the profound impact of SRT on traditional farming practices.

Motivation Amidst Challenges: The Surgana Initiative

The white grub menace in Surgana taluka of Nashik posed a significant challenge last Kharif season, leading to widespread dissatisfaction among farmers. Our SRT Sevak Manager, Mr. Yogesh Bansode, stepped in to rekindle hope and motivation among our SRT Sevaks and the farming community. His efforts have not only addressed the immediate concerns but also strengthened the resolve of our farmers to persevere through challenges.

West Bengal's SRT Pioneer: Mr. Deepak Kha's Journey

From the fields of West Bengal emerges the story of Mr. Deepak Kha, an SRT practitioner whose initial experiments with rice (Kharif June 2023) yielded remarkable results. Despite facing skepticism from local farmers, his success has now turned the tide of opinion. This Rabbi season, Mr. Kha plans to plant groundnut on his SRT raised beds, a technique learned entirely from our SRT YouTube channel. His story is a testament to the power of knowledge and the transformative potential of SRT.
