

“SRT humming..... Soil enriching, Crops booming and Farmers Empowering”

Advancing Sustainability: Key Meetings, Educational Engagements, and Strategic Discussions

Namaskar,

Welcome to the 170th edition of the Saguna Rural Foundation (SRF) Newsletter! As we continue our journey towards sustainable development and environmental conservation, this month has been particularly eventful and inspiring. From meaningful discussions at the highest levels of government to engaging with the next generation of environmental stewards, our efforts to promote the Saguna Regenerative Technique (SRT) and Saguna Vansanvardhan Technique (SVT) are gaining momentum. In this edition, we share highlights from a significant meeting at Rajbhavan, a vibrant visit from Wilson College, and a productive brainstorming session with our dedicated SRT Sevak team. We hope these stories inspire you as much as they have inspired us.

SRT Sevak Brainstorming Meeting

A two-day brainstorming meeting of the SRT Sevak was held at Saguna Baug from August 22 to 23, 2024. This meeting was graced by the presence of the legendary No-Till farmer, Mr. Pratap Chiplunkar, Kolhapur, Maharashtra. The discussions were productive and focused on advancing the implementation of the Saguna Regenerative Technique, further solidifying our collective commitment to promoting regenerative agriculture.

Meeting on "Model Tribal Village and Tribal University" at Rajbhavan, Mumbai

Under the esteemed chairmanship of Honorable Governor Mr. C.P. Radhakrishnan, a significant meeting focusing on the "Model Tribal Village and Tribal University" was held at Rajbhavan, Mumbai, on August 26, 2024. It was a moment of pride for Krushiratna Chandrashekar Bhadsavale to participate in this event. His presentation captured the attention of the top officials and dignitaries present, including the Honorable Governor, highlighting his impactful work in the field of sustainable agriculture and rural development.

Wilson College, Mumbai, Visits Saguna Baug

On August 29, 2024, Saguna Baug had the pleasure of hosting 60 students and 4 professors from Wilson College, Mumbai, for a two-day educational visit. The group embarked on a trek to Hill No. 2, where they were introduced to the forest fire and landslide prevention work implemented through the Saguna Vansanvardhan Technique (SVT). Since 2018, this hill has been a testament to our commitment to environmental conservation. The students thoroughly enjoyed the trek and found the work on the hill to be both informative and inspiring. They were also given a comprehensive presentation on the Saguna Regenerative Technique (SRT) and SVT at Saguna Baug.

Thank you!
